

Testing Engineer Electric Vehicle – Focus Battery & Drive Train

For more than 34 years, HERO MotoCorp Inc. has been bringing pleasure to millions of people by using ingenuity and enthusiasm to constantly surpass customer expectations, thereby enriching their lives. With more than 90 million two-wheelers sold, HERO MotoCorp Inc. is India's leading two-wheeler company.

Founded in 2019, Hero Tech Center Germany GmbH is the design innovation studio of HERO MotoCorp Inc. We are the architects of future—designing systems that impact and improve the world of Motorbikes.

Do you have a HERO in YOU?

Description

Safety, reliability, lifespan and performance are key for a customer acceptance of electric vehicles. Therefore you will be responsible for certification and homologation, as well as for performance- and abuse-testing of the drive train components. With your experience and competence in testing of traction batteries, power electronics and electric motors, you will ensure the quality, performance and safety of HERO's electric vehicles. With your strong managerial skills, your fast and well-grounded decisions, and your collegial attitude, you will contribute to HERO's way to sustainable transport.

Qualifications and experience:

- Experience in battery testing mandatory; technical university degree beneficial
- Sound professional understanding of electric drive trains (battery, inverter, motor)
- Strong communication skills – face to suppliers, partners and testing laboratories
- Deep knowledge of ISO26262, ECE-R100, UN38.3
- Great communication skills
- Willing to work internationally and to travel
- An understanding for complex contexts and problem solving skills
- Great enthusiasm for two-wheeler engineering and electric vehicles
